

# Privacy isn't Dead... You're Just Doing It Wrong

## Three Easy Actions That Actually Protect Your Personal Data

### Use Virtual Credit Cards

Financial surveillance in the U.S. is growing fast. Virtual cards limit what merchants., processors, and data brokers can connect back to you.

### Stop Using Chrome & Google Search

Chrome is a surveillance engine with a browser attached. Switch to a privacy-focused browser like Brave, Mulvad, or LibreWolf.

### Rotate Your Identifiers

Your email, phone numbers, and user-names are digital fingerprints. Create seperate identities -- even partial ones -- for different contexts.
